STUDIO

EXTRAORDINARY DESIGN VALUE IN AMERICAN ARTISAN CRAFTSMANSHIP

When we introduced Hammerton Studio in 2014, we saw an enormous opportunity to raise the bar in decorative lighting.

In design, we wanted to lead rather than follow. In construction, we wanted to showcase Hammerton's renowned reverence for time-honored artisan craftsmanship and authentic materials. In performance, we wanted to provide highly reliable solutions that far exceeded industry norms for aesthetics, function and quality.

After six years of remarkable growth, it's clear we are on the right track.

Hammerton Studio stands on the shoulders of a quarter century of Hammerton experience pushing the boundaries of innovative custom lighting design. Each collection has been inspired by custom work our company has brought to life in collaboration with leading interior design professionals over the years. Built to your specifications, every fixture reflects the uncompromising design and attention to detail that is distinctly Hammerton.

Bottom line: we believe you won't find this level of design value in American artisan craftsmanship anywhere else.

HAMMERTON: ELEVATING **CRAFT TO AN ART FORM**

Since 1995, Hammerton has set the industry standard for boldly designed and meticulously handcrafted American made lighting. But, like many notable businesses, it started with two young men in a garage. One of those men, Levi Wilson, grew up in his father's ornamental iron fabrication shop and had the art of metalcraft in his blood.

Hammerton got its foothold by serving the burgeoning second home market in nearby Park City, and word of the young upstart company spread fast. Levi's obsession with uncompromising aesthetic and functional design, perfect scale and his '10-inch rule' - requiring each completed fixture to satisfy a discerning eye from less than a foot away - were the guiding principles that attracted the attention of leading designers and architects nationwide and fueled the company's growth.

Today, the Hammerton team of over 100 artisans, designers, engineers and sales and service personnel operates out of the company's 50,000 square foot Salt Lake City facility. Hammerton fixtures illuminate leading hotels and restaurants, luxury resorts and casinos, corporate headquarters, private clubs and some of the most beautiful homes in North America.

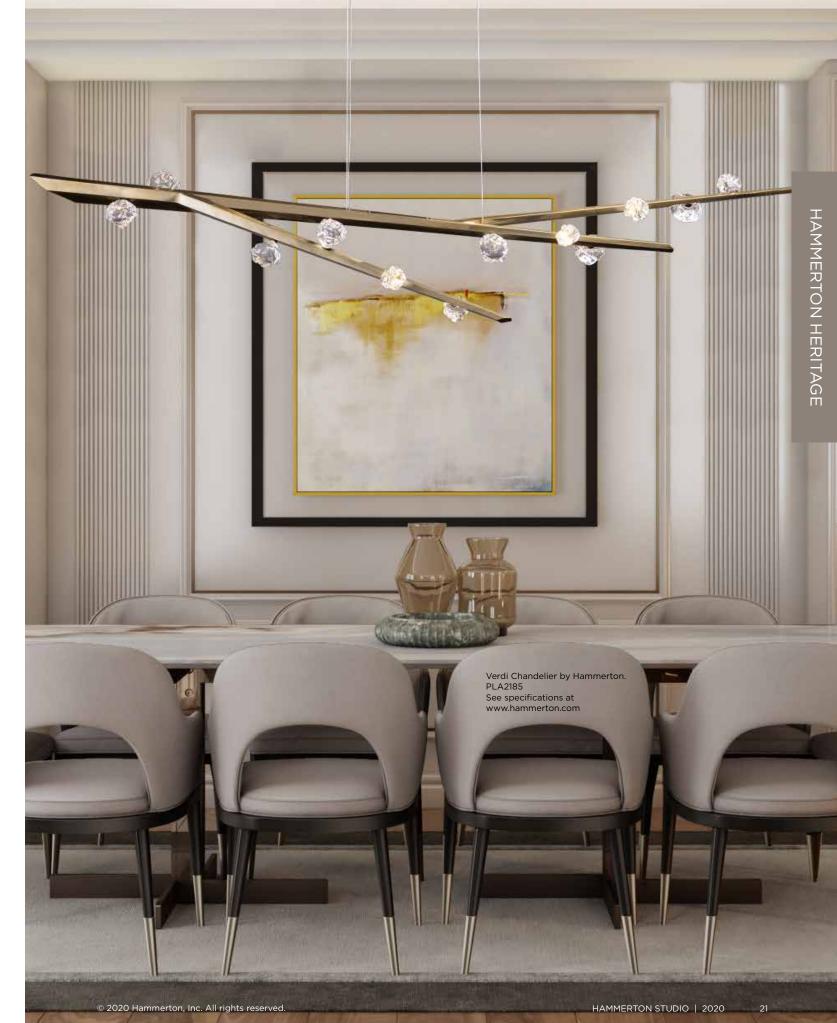

In an era of mass production and foreign sourcing, Hammerton stands alone. Unlike the majority of our industry peers, we design and handcraft our fixtures entirely in the U.S. We also source raw materials domestically.

Most importantly, all product design, engineering and manufacturing takes place under one roof, so we maintain end-to-end control of all operational activities involved in servicing our customers. This enables us to produce fixtures of unparalleled quality as well as faster turnarounds, superior service, exceptional value and ultimately, a very happy customer.

EXPERTISE IN MULTIPLE MATERIALS

Hammerton is known for pushing the boundaries of lighting design. This requires continuously evolving our palette of design elements - material, shape, form, composition, color, texture and space. To do this, we've developed deep expertise in many materials as well as a wide range of fabrication tools and technologies. Seamless integration of these capabilities is the 'secret sauce' that drives our design leadership.

METALWORK

ARTISAN GLASS

Hammerton began 25 years ago as a blacksmith shop, but we've come a long way since then. Indeed, harnessing the full design potential of steel and other metals involves far more than a hammer and anvil.

Most importantly, it involves a versatile team of world-class artisans who are disciplined in a broad range of old and new metal fabrication processes.

Time-honored skills like blacksmithing, metal sculpting and texturing bring hand-hewn aesthetic detail to traditional and organic fixtures, while high-precision machining and cutting technologies facilitate the clean lines, geometric forms and polished surfaces of more contemporary designs, as well as higher quality and lower cost.

Over the past decade we've developed deep in-house capabilities in blown, kilnfused and cast artisan glass. As a design material, glass provides a limitless platform for innovation because it combines light, form, color and texture in a single medium. It's also ideally suited to today's interiors.

Most Hammerton Studio products incorporate blown, kiln-fused or cast artisan glass in shades, lenses, diffusers and decorative elements. Many of our glass designs were conceived in conjunction with custom work we've done for leading interior designers, and they are unique to Hammerton.

With deep expertise at the intersection of metal and glass fabrication, Hammerton is laying the foundation for a new era in lighting innovation.

A COMPLETE **CUSTOM SOLUTION**

As one of the largest U.S.-based custom lighting manufacturers, Hammerton is uniquely gualified to handle the most demanding custom requirements.

With world class design, engineering, manufacturing and service teams working together under one roof in our Salt Lake City facility, we're able to provide an end-to-end solution that seamlessly supports the full scope of any custom project – without the headaches typically associated with custom work. And we deliver most custom orders in 6-10 weeks.

Our custom clientele includes business leaders, award-winning entertainers, internationally acclaimed designers, sports legends, princes, politicians and leading luxury hospitality brands.

HAMMERTON CUSTOM SERVICES

- Concept development
- Scale & proportion optimization
- Modification of catalog designs
- Integration with lighting control systems
- Regulatory compliance (e.g. CA Title 24, Dark Sky)

- Full scale drawings
- DWG file integration
- Installation specifications
- Custom crating & white glove delivery
- Onsite installation support

INTEGRATED LED

Our superior quality standards at Hammerton demand the very best in everything we do. So when it came to adopting an LED platform, we were patient. We waited and watched while the industry evolved and the technology became more reliable in light output, color consistency, light quality and dimming performance. And it finally arrived.

Today, many Hammerton Studio fixtures include integrated LED powered by CREE®, a U.S.-based manufacturer recognized worldwide as a market-leading innovator in LED technology. In fact, Hammerton is currently the only custom decorative lighting brand powered by CREE® LEDs.

Our integrated LED fixtures use the highest quality 2 SDCM, 93+ CRI LEDs, powered by drivers that dim smoothly to 1%. So you can rest assured that your fixture will provide the highest quality, natural looking and color consistent LED light available, and can be easily retrofitted to operate seamlessly with legacy forward and reverse phase dimmers.

Most Hammerton Studio fixtures that do not offer integrated LED can accommodate LED retrofit bulbs, including JA8 compliant lamping for CA Title 24.

CREE® LEDS: BETTER LIGHT

Why does it matter that Hammerton LEDs are 2 SDCM, 93+ CRI and 2,700K CCT? LED technology can be a mind-bender, but here are the key points:

2 SDCM = Excellent Color Consistency. Believe it or not, you can frequently see color differences between LEDs that are ostensibly the same color. This is measured in standard deviations of color matching, or SDCM. The greater the SDCM, the easier it is to see color differences. The human eve generally starts seeing color differences at the 3 SDCM level, and the vast majority of LEDs used in the lighting industry are 4-7 SDCM.

93+ CRI = Natural Quality Light. 'CRI' stands for Color Rendering index, and measures a light source's ability to show colors realistically compared to a familiar reference such as incandescent light or daylight. For example, incandescent lamps are ~95-100 CRI, while cool white fluorescent lamps are ~62 CRI. So the lower the CRI value, the less natural some colors may appear. Many decorative lighting brands use LEDs with 80 CRI or less because they're less expensive and more widely available.

2,700K-3,000 CCT = Preferred Light Color. 'CCT' stands for color correlated temperature and refers to the tone of 'white light' that is emitted from an artificial light source. A lower CCT of 2,000K is a hotter orange-yellow color, while a higher CCT of 4,000K is a cooler blue color. 2,700-3,000K is the 'warm white' color typically associated with incandescent lighting, and is considered ideal for most residential and hospitality applications.

HAMMERTON STUDIO FINISHES:

EXQUISITE. LEED COMPLIANT. **GUARANTEED TO LAST.**

Now you don't have to compromise aesthetics for durability, weather resistance or environmental compliance. Hammerton Studio finishes combine the visual character and richness of hand-applied wet paints with the rugged durability and environmental benefits of powder coats to create beautiful finishes that are guaranteed to last. Our outdoor finishes are specially formulated to withstand the harshest climates, and all of our finishes can contribute toward LEED credits.

When selecting options it's always a good idea to ask your Hammerton representative for actual samples. While the swatches shown in these pages closely approximate actual color and character, they may not be exact due to the inherent limitations in photography and printing.

ARGENTO GREY (AG)

TEXTURED BLACK (TB)

STATUARY BRONZE (SB)

ALL-CLIMATE OUTDOOR FINISHES: **AAMA 2604 & 2605 CERTIFIED**

Hammerton Studio outdoor finishes provide the industry's highest standard for long-lasting performance. We use an AAMA 2604 powder coating process that has been rigorously tested by the American Architectural Manufacturer's Association to withstand UV and salt spray corrosion in even the harshest coastal, tropical, mountain and desert climates. AAMA 2605 is also available -- please contact your Hammerton representative for details.

- Weather & Corrosion Resistant
- ✓ Rich Color & Character
- ✓ Superior Hardness
- ✓ Green/LEED Compliant
- ✓ Lifetime Limited Warranty

TRANSLUCENT FINISHES

Our translucent finishes are specially formulated powder coats that capture the visual appeal of plated metal finishes while also showcasing the unique craftsmanship of each fixture. Subtle yet intentional variations in color reveal an artisan's work forging, hammering, hand-graining and polishing the underlying steel.

- Rich Color & Character
- ✓ Superior Hardness
- ✓ Green/LEED Compliant
- ✓ Five Year Limited Warranty

METALLIC OPAQUE FINISHES

Hammerton Studio metallic opaque finishes provide a complete coating of rich color and lustrous sheen that complements a variety of transitional and contemporary styles. Like all our finishes, they're ruggedly durable, environmentally compliant, and can contribute toward LEED credits.

- ✓ Rich Color & Character
- ✓ Superior Hardness
- ✓ Green/LEED Compliant
- ✓ Lifetime Limited Warranty

PLATED METAL FINISHES: THE HARD FACTS

If you've ever wondered why Hammerton doesn't offer brushed chrome or other plated finishes, just Google "metal plating facility + Superfund" and you'll find over 100,000 reasons why.

Superfund, of course, is the U.S. Environmental Protection Agency program that deals with uncontrolled hazardous waste sites. There are well over a thousand Superfund sites in the U.S. and metal plating facilities are high on the list.

Metal plating, also called electroplating, is a highly toxic process due to its heavy reliance upon dangerous chemicals and compounds like cyanide, chromium and cadmium. As a result, most metal plated light fixtures are manufactured in China and other countries that have significantly lower environmental quality standards.

Hammerton is one of a small handful of lighting manufacturers that offer environmentally friendly alternatives to plated finishes.

AXIS COLLECTION

We've expanded our design work in artisan cast glass to include the new Axis collection. Thick rectangular cast glass is crafted from recycled material brilliantly salvaged from Hammerton's glassblowing operations. Integrated LED paired with this unique glass creates a prism of dramatic refracted light.

This collection includes a linear suspension, hexagonal ring chandelier, pendant, multi-ports and a sconce.

NEW AXIS LINEAR SUSPENSION

The glass may look like ice, but this fixture is hot! Thick artisan cast glass paired with hand polished steel extend in sleek lines from an invisible center axis. Integrated LED adds surprising ambient lighting at each end of the fixture while downlights ensure there's plenty of task lighting. Choose from eight finishes.

Product	Description	Dimensions	OAH	Light Output
PLB0060-50	50"W Linear Suspension	50.7 W x 9.3 D	11.0 65.0	2.720 Jumana
PLB0060-64	64"W Linear Suspension	63.4 W x 10.9 D	11.9 - 65.9	2,720 lumens

Includes matching rectangular canopy and height-adjustable rods that ship in 3", 6", 12"(2) and 24" threaded segments. Integrated LED with 93+ CRI and 2,700 CCT is standard for all Axis products. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

AXIS

CHB0060-35-SN-GC Axis 35" D Hexagonal Ring Chandelier Shown with Satin Nickel translucent finish (SN) Clear textured cast glass (GC)

NEW AXIS HEXAGONAL RING CHANDELIER

Clean and cool, the new Axis Hexagonal Ring chandelier features glistening thick cast glass with minimal hand-polished steel in a geometric form. Integrated LED refracted through the glass plus three downlights makes this fixture a dramatic artistic addition above a foyer table or grand piano.

Product	Description	Dimensions	ОАН	Light Output	Suspension Options
CHB0060-35	35"D Hexagonal Ring	4.1 H x 34.6 Dia	12.4 - 122.5	3,180 lumens	Cable

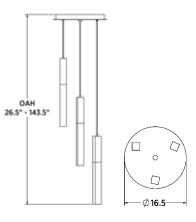

Each includes matching round canopy and height-adjustable cable suspension. Integrated LED with 93+ CRI and 2,700 CCT is standard for all Axis products. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches. CHB0060-35-SN-GC Axis 35"D Hexagonal Ring Chandelier Shown with Satin Nickel translucent finish (SN) Clear textured cast glass (GC)

AXIS PENDANT & MULTI-PORT CHANDELIERS

Axis pendants can be ordered singly or in nine standard multi-port canopy configurations with matching braided suspension cords. Pendants and multi-port fixtures ship with 10' of field adjustable cord per pendant. Custom canopies and longer cords can be easily accomodated.

Each pendant provides approximately 340 lumens of 93 CRI/2,700 K light output. To calculate the total light output of any configuration, multiply the number of pendants by 340 lumens.

Product	Description	Canopy Dimensions	ОАН
LAB0060-01	Single Pendant	6 Dia	26.0 - 143.0
CHB0060-03	3 Pendant w/ Round Canopy

GLACIER

IDB0060-26-HB-GC Axis Indoor Wall Sconce Shown with Heritage Brass translucent finish (HB) Clear textured cast glass (GC)

GLACIER COLLECTION

Ice or diamonds? You decide. Regardless, the Glacier collection elevates recycled glass to functional art.

Glacier pairs hand polished metalwork with thick artisan cast glass crafted using excess material from Hammerton's glassblowing operations. The unique characteristics of this cast glass allows it to dramatically refract light in surprising ways. Ring chandeliers, linear suspension, a pendant and sconce are available with Glacier glass.

NEW GLACIER LINEAR SUSPENSION

Recycled glass never looked so glamorous! The new Glacier Linear Suspension features floating panels of thick artisan cast glass paired with hand polished steel. Integrated LED makes the glass sparkle while downlights provide plenty of task lighting. The Glacier linear suspension measures 50"W and is available in eight finishes.

Product	Description	Dimensions	OAH	Light Output
PLB0061-50	50"W Linear Suspension	4.0 H x 50.9 W x 3.5 D	11.0 - 65.0	3,000 lumens

NEBULA COLLECTION

Goodbye, Mr. Edison! Individually handcrafted cast glass diffusers offer a revolutionary alternative to traditional bulbs in this captivating collection of blown glass pendants in three styles. Each diffuser is illuminated with 2,700K, 93+ CRI CREE[®] integrated LED components. Choose from three cast glass diffuser shapes - Geo, Floret or Zircon.

Showcase your favorite Nebula blown glass style singly or grouped in our standard multi-port chandelier configurations. Or feature all three styles together in a 'Cosmos' multi-port chandelier, as shown on the facing page. Aster, Meteo and Nova blown glass pendants are offered in four glass colors and four opaque finishes. Nebula pendants and multi-ports can also be ordered with an E26 base that takes one traditional 40W incandescent bulb.

NEBULA BLOWN GLASS MULTI-PORT CHANDELIERS

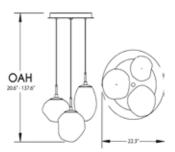

Nebula glass is available in ten standard multi-port canopy configurations. Choose your favorite glass style from the pendants on the facing page, or combine all three in a Cosmos multi-port chandelier. Pendants and multi-port chandeliers can be ordered with either an LED-lit cast glass diffuser or an E26 40W base for incandescent lighting. Each ships with 10' of field-adjustable suspension cord per pendant. This provides a maximum OAH of 133" - 137" depending upon the blown glass style. Custom canopies and longer cords are also available.

Each includes matching canopy and 10' of field-adjustable braided cord per pendant. Custom canopies and longer cords are easily accommodated. Shades specified with incadescent lamping ship with a E26-40W base. Bulbs are not included.

For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

BLOSSOM COLLECTION

Undulant 'blossoms' of LED-lit handblown glass nod to an organic aesthetic that exudes casual sophistication. The look is soft, relaxed and surprisingly unique. Each glass shade is a one-of-a-kind artisan creation reflecting the combined talents of Hammerton's metal and glass fabrication teams. Choose from a wide selection of ceiling fixtures and pendants shown on these pages.

For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

BLOSSOM PENDANT & MULTI-PORT CHANDELIERS

Blossom pendants are available in nine standard multi-port configurations with matching cords. Pendants and multi-ports ship with 10' of field-adjustable suspension cord per pendant, providing a maximum OAH of 134". They can be ordered in eight finishes.

Each pendant provides approximately 340 lumens of 2,700K light output. To calculate the total light output in lumens of any multi-port configuration, multiply the number of pendants by 340 lumens.

Custom canopies and longer cords are also available.

GEM COLLECTION

Inspired by the idea of lighting as jewelry for the home, this enchanting collection features sparkling 'gems' of artisan blown glass. Each faceted gem is illuminated with integrated LED, taking the place of a traditional bulb while emitting a captivating glow that adds surprising drama to surrounding spaces.

Gem fixtures are powered by superior quality 93+ CRI, 2,700K CREE[®] LEDs and are dimmable to 1%. Choose from a wide selection of wall and ceiling fixtures in four glass colors and eight finishes.

*IDB0039-11	Gem 11"H Arm Sconce	10.7 H x 8.2 W x 8.9 D	

*Can be wall mounted with glass shade facing up or down. Integrated LED with 93+ CRI and 2,700 CCT is standard for all Gem products. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

Gem Indoor Belvedere Sconce Shown with Metallic Beige Silver opaque finish (BS) Clear Gem blown glass (C)

ROCK CRYSTAL COLLECTION

Balancing contemporary and modern design, this unique collection captures the raw beauty of natural rock quartz in LED-illuminated artisan blown glass.

Pair luxurious Rock Crystal blown glass shades with hand-polished Belvedere metalwork for a look that exudes modern elegance, or spotlight them in a wide selection of chandeliers, linear suspensions, pendants, multi-ports and sconces.

Rock Crystal lights are offered in a choice of four glass colors and eight finishes. Each uses superior quality 2,700K CREE® LED components that are 93+ CRI and dimmable to 1%.

NEW MODERN BRANCH

A 'branching bubble' chandelier unlike any other! The new Rock Crystal Modern Branch elevates a familiar look with one-of-a-kind handblown glass shades reminiscent of natural quartz. Each shade features integrated LED, taking the place of traditional bulbs and illuminating the fixture's artisan craftsmanship. Available in two sizes.

Product	Description	Dimensions	OAH	Light Output
PLB0050-BA	6 pc. Branch	43.6 W x 31.5 D	26.0.97.0	1,080 lumens
PLB0050-BB	8 pc. Branch	52.6 W x 36.8 D	26.0 - 83.0	1,440 lumens

Each includes matching round canopy and height-adjustable rod that ships in 3", 6", 12"(2) and 24" threaded segments. Integrated LED with 93+ CRI and 2,700 CCT is standard for all Rock Crystal products. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

Chilled Amber blown glass (CA)

NEW ROCK CRYSTAL MODERN VINE

A whimsical interpretation of a flowering vine, the new Rock Crystal Modern Vine chandelier features LED-lit artisan glass shades paired with sleek modern steel designed in an organic shape. Its vertical orientation makes the Modern Vine a great alternative to multi-ports and other fixtures commonly used for challenging spaces like stairwells and foyers.

Product	Description	Dimensions	OAH	Light Output
CHB0050-VA	6 pc. Vine	30.4 H x 38.8 W x 38.8 D	39.0 - 93.0	1,080 lumens
CHB0050-VB	8 pc. Vine	41.9 H x 37,1 W x 37.1 D	50.0 - 104.0	1,440 lumens

Each includes matching round canopy and height-adjustable rod that ships in 3", 6", 12"(2) and 24" threaded segments. Integrated LED with 93+ CRI and 2,700 CCT is standard for all Rock Crystal products. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

NEW ROCK CRYSTAL RADIAL RINGS

Like a bright sunflower, the new Rock Crystal Radial Rings shine from the inside out. Featuring bands of handpolished steel and organic-inspired blown glass shades, Radial Ring chandeliers are both stunning and functional. For grand interior spaces, choose a two-tier Radial Ring chandelier to add radiant light, airy volume and double the drama without obstructing views.

ROCK CRYSTAL PENDANTS & MULTI-PORT CHANDELIERS

Rock Crystal multi-ports are available in nine configurations. Each features a standard canopy conbination of 15"H, 17"H and 19"H Rock Crystal pendants. Multi-ports ship with matching canopies and 10' of field-adjustable suspension cord per pendant, allowing a maximum OAH of 140". Custom canopies and longer cords are available.

Each pendant provides approximately 340 lumens of 2,700K LED light output. To calculate the total light output in lumens of any multi-port configuration, multiply the number of pendants by 340 lumens.

Want to create a custom multi-port with different glass styles? Turn to page 17 to view our Custom Multi-port Configuration Overview.

OPTIC BLOWN GLASS COLLECTION

Very few lighting styles captivate the eye quite like Hammerton Studio Optic Blown Glass.

Crafted in our Salt Lake City glass studio, each shade is blown from up to five pounds of glass and achieves its stunning visual effect from a molten glass ribbon that is hand-wrapped around the glass bubble during fabrication. The ribbon adds variation to the shade wall thickness and creates a magical dance of light and color within the glass. Due to the artisan-crafted character of each shade, no two are exactly alike.

This popular collection includes three glass shade styles: Coppa, Ellisse and Terra. Showcase your favorite style in sconces, pendants and multi-port chandeliers, or feature all three styles together in a 'Misto' multi-port with 3-12 lights. Choose from four glass colors and four finishes.

OPTIC BLOWN GLASS MULTI-PORT CHANDELIERS

Optic Blown Glass is available in ten standard multi-port canopy configurations. Choose your favorite glass shade from the pendants on the facing page, or combine all three styles together in a Misto multi-port chandelier.

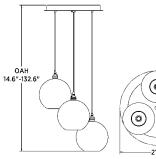

Pendants and multi-port chandeliers ship with one E36 40W base and 10' of field-adjustable suspension cord per pendant. This provides a maximum OAH of 129"-134" depending upon the shade style.

Custom canopies and longer cords are also available. Specifications are on the next page.

Want to create a custom multi-port with different glass styles? Turn to page 17 to view our Custom Multi-port Configuration Overview.

AALTO COLLECTION

Inspired by famous Finnish architect and designer Alvar Aalto, this sparkling collection reflects Mr. Aalto's tenet of 'Gesamtkunstwerk', or a total work of art. Intriguing geometric blown glass shades nod simultaneously to vintage and modern style. Pair Aalto blown glass with a selection of chandeliers for a mid-century inspired look, or showcase their captivating style in a wide selection of chandeliers, linear suspensions, pendants, multi-ports and sconces.

Aalto fixtures are offered in a choice of four glass colors and eight finishes. Each uses superior quality 2,700 CREE® LED components that are 93+ CRI and dimmable to 1%.

AALTO

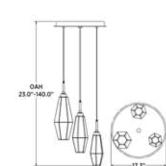

AALTO PENDANTS & MULTI-PORT CHANDELIERS

Aalto multi-ports are available in nine configurations. Each features a standard canopy configuration of 15"H, 17"H and 19"H pendants. Multi-ports ship with matching canopies and 10' of field-adjustable suspension cord per pendant, allowing a maximum OAH of 140".

Each pendant provides approximately 340 lumens of 2,700K LED light output. To calculate the total light output in lumens of any multi-port configuration, multiply the number of pendants by 340 lumens.

Custom canopies and longer cords are available.

Want to create a custom multi-port with different glass styles? Turn to page 17 to view our Custom Multi-port Configuration Overview.

APOTHECARY COLLECTION

Science meets art in this sleek modern collection showcasing crisp, crystal clear blown glass shades subtly reminiscent of 19th century apothecary jars. Multi-port chandeliers feature sparkling cascades of three different glass shade sizes in groups of 3 to 12 lights. Single pendants and sconces are offered in each shade size. Choose from four handcrafted glass colors and four finishes.

Hammerton glass artisans craft these Apothecary shades in four colors: Clear, Bronze, Amber and Smoke. Pair any glass color with your favorite vintage bulb and one of four opaque finishes.

See pendant specifications on page 126.

BAMBOO COLLECTION

Sparkling smooth columns of fire-polished glass take center stage in this sleek and sophisticated contemporary lighting collection. American artisans carefully hand-form and craft each piece of bamboo glass to achieve its distinctive luminous quality and dramatically cast light upon surrounding surfaces.

Our broad selection of Bamboo fixtures lets you showcase this remarkable look in surprising ways throughout your home, from pendants, multi-ports and flush mounts to indoor and outdoor sconces. See outdoor sconces on page 228.

BAMBOO FLUSH MOUNTS

An intriguing alternative to the usual round ceiling light, our 3- and 5-light flush mounts are both available with standard size (MM) Bamboo glass.

Integrated LED option is 93+ CRI with an output of 340 lumens and 2,700 CCT. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

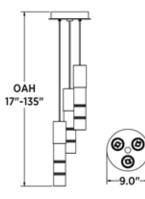

BAMBOO PENDANT & MULTI-PORT CHANDELIERS

Bamboo multi-ports are available in eleven standard canopy configurations and four opaque finishes. They can be ordered with either a GU10 base or integrated LED. For integrated LED, each pendant provides approximately 340 lumens of 93CRI/2,700K light output. To calculate the total light output of any configuration, multiply the number of pendants by 340 lumens.

Multi-ports include matching canopies and ship with 10' of field-adjustable braided cord per pendant, which allows a maximum OAH of 135". Custom canopies and longer cords are also available.

PLB0042-44	44"D Oval	6.4 H x 44.0 L x 24.0 W	18.1 - 124.6	2,800 lumens	Cable

44"D oval includes a round canopy and field-adjustable cable suspension. Integrated LED with 93+ CRI and 2,700 CCT is standard for all Parallel products. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

PARALLEL LINEAR SUSPENSION

This sleek fixture packs a lot of visual and functional horsepower in a minimalist design. LED light diffused through beautiful kiln fused glass creates a magic glow of ambient light, while three downlights provide 1,030 lumens of task lighting.

An ideal solution for slim dining tables, we've also seen a triptych of this fixture staggered above larger dining areas.

Product	Description	Dimensions	OAH	Light Output	Suspension Options

Each includes matching rectangular canopy and height-adjustable cable suspension. Integrated LED with 93+ CRI and 2,700 CCT is standard for all Parallel products. For complete specification details and drawings on all products, visit hammertonstudio.com. Measurements are listed in inches.

PLB0042-47-SN-CR Parallel 48"L Linear Suspension Shown with Satin Nickel translucent finish (SN) Clear Rimelight glass (CR)

PARALLEL

PARALLEL PENDANTS & MULTI-PORT CHANDELIERS

Parallel pendants can be ordered singly or in nine standard multiport canopy configurations with matching braided suspension cords. Pendants and multi-port fixtures ship with 10' of field adjustable cord per pendant. Custom canopies and longer cords can be easily accommodated.

Each pendant provides approximately 340 lumens of 93CRI/2,700K light output. To calculate the total light output of any configuration, multiply the number of pendants by 340 lumens.

URBAN LOFT COLLECTION

This versatile collection offers a modern interpretation of the Arts & Crafts movement. Functional components like pins and straps are elevated to decorative details, with the craftsman's work revealed through translucent steel finishes. Beautifully handcrafted kiln-fired art glass extends the artisan story through shades and lenses in four styles.

Gritty yet sophisticated, Urban Loft lights are equally at home in converted warehouse flats, a stylish midtown apartment or a contemporary mountain retreat.

IRONWOOD COLLECTION

'Rect tube' - industrial rectangular-shaped steel tubing - is an unusual choice for organic lighting design, but the results are striking in the Ironwood Collection. Our artisans hammer and sculpt this rugged material into a surprisingly elegant interpretation of the natural world that suits a broad range of interior styles.

Choose from four handcrafted glass styles and eight finishes.

IRONWOOD LINEAR SUSPENSION

Offered in three sizes, our Ironwood linear suspension offers plenty of ambient and task lighting. Choose either standard incandescent lamping with a frosted acrylic bottom diffuser as shown at right, or integrated LED with a steel bottom base as shown below. See specifications on page 159.

IRONWOOD

CARLYLE COLLECTION

Inspired by the classic elegance of its namesake Manhattan hotel, the Carlyle collection subtly nods to sophisticated Art Deco style. Bold geometries, sleek lines and richly hand-polished steel finishes capture a timeless aesthetic that's perfectly suited to a wide range of interiors.

Most fixtures offer a selection of domestically hand-textured art glass shades and lens materials. Choose from eight environmentally compliant finishes, including four luxurious opaque finishes and four translucent finishes that rival plated alternatives in visual appeal.

CORONA CHANDELIERS

Carlyle Corona ring chandeliers are offered in 24", 34" and 45" diameters, while the Corona linear suspension is offered in a 44" width. All Corona fixtures can be ordered with cylinders in your choice of two glass styles, as well as eight finishes.

Product	Descriptions	Dimensions	ОАН	Electrical	Light Output

TORCHLIGHT CHANDELIER

A contemporary twist on the traditional wagon wheel fixture style, the versatile Torchlight chandelier incorporates an elegant ring of textured kiln-fused glass.

Order your torchlight with white linen shades, exposed lamping, or glass cylinders in three colors. You can also specify your preferred ring style from four glass accent options.

TEXTURED GLASS COLLECTION

Art glass serves as craftsman's canvas in our versatile Textured Glass collection. Drum, square and multi-port chandeliers, linear suspensions, pendants, sconces and vanity lights are offered in six glass styles shown below. Each piece of textured glass requires skilled artisan precision and up to two kiln passes to achieve its visual appeal.

Drum fixtures are especially difficult to do well because the kiln firing process rarely results in panels that are identical in dimension and form. But take a close look at our Textured Glass drums like the ones shown at right and you'll see seamlessly aligned glass panels every time.

DOWNTOWN MESH

When common materials are used in uncommon ways, the result is often magical. Who would guess that slotted heavy gauge steel mesh – the same rugged stuff that's used for sorting rocks in quarries – could transform the look of a light fixture?

The Downtown Mesh collection captures the intrigue of this industrial material by evoking a sleek urban aesthetic that transcends its utilitarian nature. Depending upon your preferred fixture and style, pair the heavy gauge mesh diffuser with frosted artisan glass or a crisp white linen shade. Or omit the shade and add vintage-style Edison bulbs for a more gritty industrial look.

DOWNTOWN MESH Behind the Design

Inspiration comes from many places. In the case of Downtown Mesh, it was from a dumpster.

While working on a personal project in 2012, one of our product designers pulled a large piece of this rugged stuff from an industrial recycling bin. Intrigued by the interplay of ripple and parallel wires in the screen material, he set to work bending and shaping it in round and rectangular forms.

A few months later, the Downtown Mesh collection was introduced, and today it's still one of our best selling Hammerton Studio collections.

CSB0020-13-FB-F Downtown Mesh Cover Sconce Shown with Flat Bronze opaque finish (FB) Frosted lens (F)

DOWNTOWN MESH SCONCE

TWEED COLLECTION

A contemporary reinterpretation of the iconic fabric shade, our Tweed collection showcases diffusers crisply crafted from loosely woven straps of heavy gauge steel.

Distinctive yet familiar, the look is surprisingly versatile. When paired with vintage bulbs, Tweed fixtures take on a gritty urban aesthetic; when layered with a white linen shade or frosted cylinder, they exude surprising warmth. Pair your preferred look with one of our four opaque finishes.

TWEED LINEAR SUSPENSION

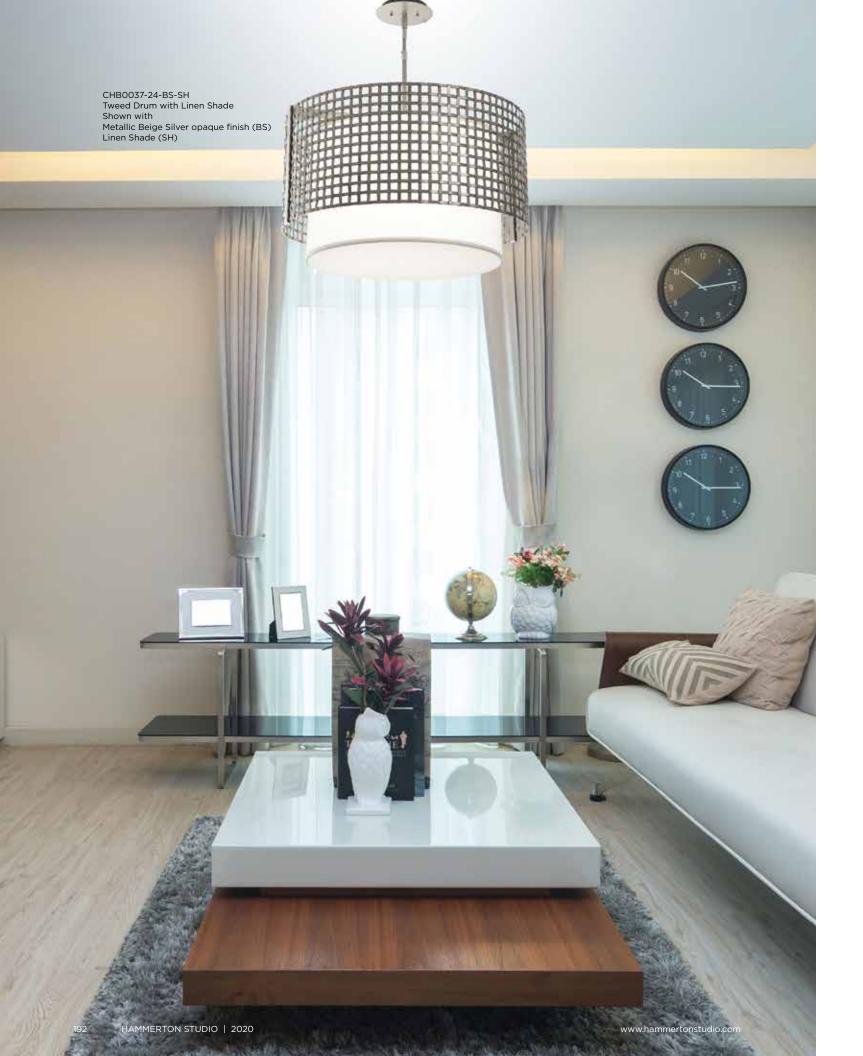

This rectangular Tweed design adds surprising texture and visual interest over a dining table, entertaining bar, or wherever a statement needs to be made. Choose from three sizes.

UPTOWN MESH COLLECTION

As a diffuser material, there's no match for fine woven steel mesh. Mesh emits strength and softness, volume and airiness, warmth and sophistication... all simultaneously. Substitutes like perforated or stamped steel can't begin to match its ethereal elegance.

Our Uptown Mesh collection showcases the urban sophistication of this remarkable material. Depending upon your preferred fixture and style, pair the fine mesh diffuser with frosted glass or a white linen shade. Or skip the shade and go with exposed bulbs for a more industrial look.

UPTOWN MESH LINEAR SUSPENSION

Over a dining table, game table or entertaining bar, this sleek fixture makes a distinctive design statement. Order with frosted glass cylinders or exposed lamping. Note that the integrated LED option is available only with frosted glass cylinders.

TEMPEST COLLECTION

Swirling bands of smooth metal bring an urban aesthetic to this popular collection. Heavy 12-gauge steel, handcrafted construction and a sophisticated asymmetrical design give Tempest its bold look.

No thin metals, no stenciled patterns, no repeats.

The Tempest collection layers its signature steel bands with either a frosted glass lens or a crisp linen shade. Or go with bare bulbs for a more industrial vibe. Finish the look with a choice of four opaque finishes.

TEMPEST DOUBLE DRUM

The Tempest Double Drum juxtaposes our signature Tempest shade with the polished glamour of textured fused glass that's handcrafted in our kilns. Choose from two sizes and four finishes below.

Product	Description	Dimensions	ОАН	Bulb Qty	Lens	Electrical
CHB0013-2A	24"D Drum	22 H x 24.0 Dia	28.4 - 82.4	4	Frosted Granite	F26 601W

OUTDOOR COLLECTION

For beautiful UL-rated outdoor lighting that's guaranteed to last in any climate, look no further. Hammerton Studio offers the most durable outdoor decorative lighting solutions available on the

Our outdoor fixtures combine rugged design with architectural quality finishes that are specially formulated to resist both fading and corrosion in heavy UV and salt spray environments. So they can withstand the harshest coastal, tropical, mountain and desert climates.

AAMA 2604 & 2605 RATED FINISHES: All Climate Performance

Superior outdoor decorative lighting involves much more than aesthetics, lamping and light output. Outdoor fixtures must also resist the damaging effects of sunlight, ocean air, humidity and extreme temperatures.

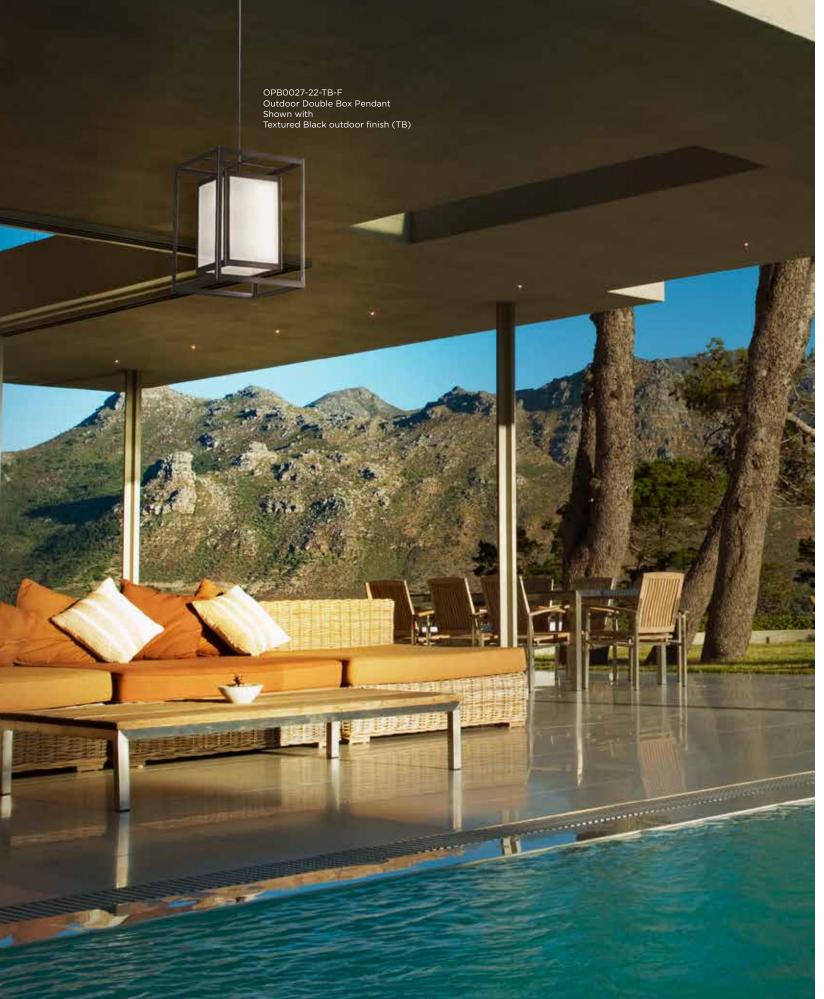

Hammerton Studio outdoor fixtures deliver those benefits, and more. Each is constructed in aluminum, pretreated using a rugged marine-grade process, and finished with high performance AAMA 2604 powder coats. AAMA 2604 is a "super durable" finish performance standard set by the American Architectural Manufacturer's Association (AAMA). AAMA 2605 is also available by special order.

Our finishes are environmentally compliant, so our outdoor fixtures can contribute towards LEED credits. And, they're 100% guaranteed for as long as you own the fixture.

We offer three colors of AAMA 2604 all-climate outdoor finishes: Textured Black, Statuary Bronze and Argento Grey. Lens options for each fixture can be viewed on the corresponding product pages.

IDA DARK SKY COMPLIANCE

Many Hammerton Studio outdoor lights have been certified by the International Dark Sky Association (IDA), which is the industry's authoritative voice on light pollution. IDA approved lights are required by an increasing number of municipalities and planned communities across the U.S. because they minimize glare, reduce light trespass and don't pollute the night sky. To find IDA compliant fixtures, look for the IDA seal of approval throughout these pages.

OFB0027-13-TB-F Outdoor Single Box Flush Mount Shown with

OLB0027-48-TB-F Outdoor Box Linear Suspension With Frosted Cylinders Shown with Textured Black outdoor finish (TB)

OUTDOOR LIVING SOLUTIONS

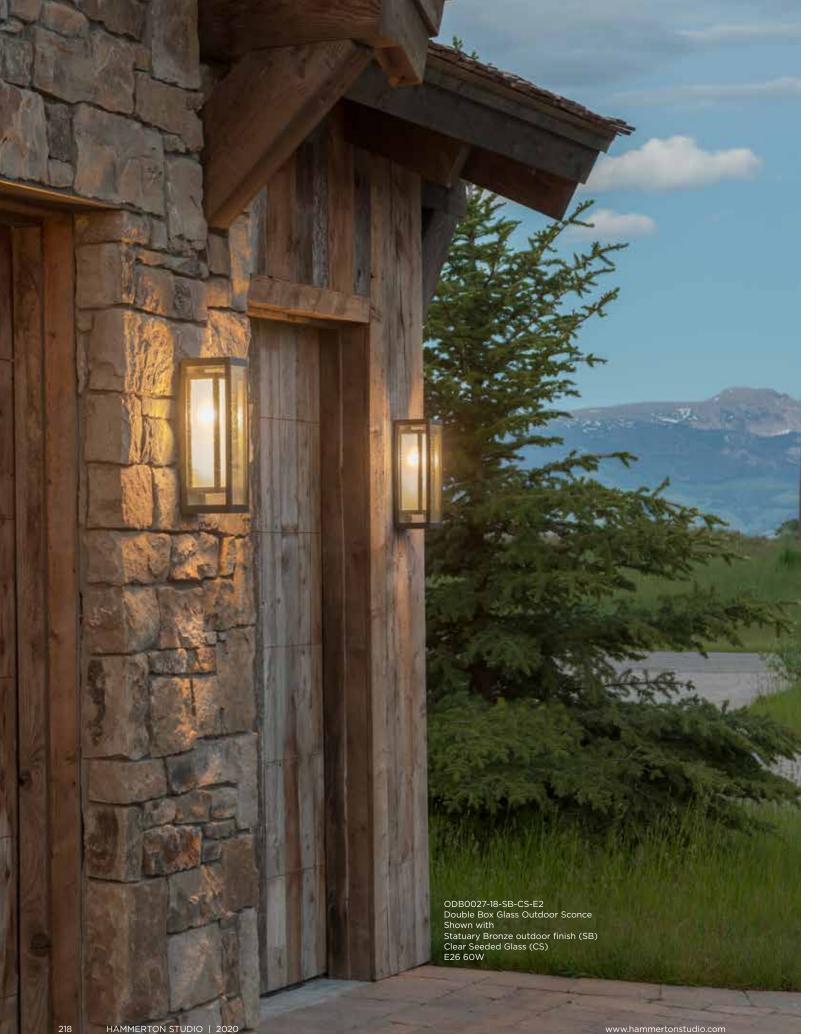

Ensure your outdoor entertaining shines bright with our damp-rated ceiling lights. Timeless designs include a flush mount, single and double box pendants, and a 48"W linear suspension. Each features frosted seeded glass and is designed to complement our top-selling wet-rated box sconces on page 219.

Like all Hammerton Studio outdoor lights, these styles are finished with super durable, high performance AAMA 2604 finishes and include a lifetime limited warranty.

Product	Description	Dimensions	ОАН	Electrical

OUTDOOR BOX SCONCES

One of our best-selling outdoor fixtures, these clean-lined Single Box and Double Box sconces lend themself to a wide range of exterior styles. The 12"H Single Box features a frosted glass lens, while the Double Box can be ordered in 18" or 26" heights with an exterior lens in either Medium Mesh or Clear Seeded Glass. Choose from three outdoor finishes.

Outdoor Double Box Box Sconces that include our AC LED electrical option are IDA Dark Sky Certified.
